PROFESSIONAL SUMMARY

Computer Engineering graduate and UI/UX Designer with 1 year of experience designing user-centred digital experiences, from research and user flows to wireframes, interactive prototypes, and high-fidelity interfaces. Experienced in building consistent design systems and translating user needs into clear, intuitive product experiences using Figma. Also brings hands-on software QA practice, including manual test design, API testing with Postman, test assertions, defect documentation, and test reporting. Combines visual design, analytical thinking, and a technical foundation to create thoughtful, usable, and reliable digital products.

CORE SKILLS

Product & collaboration: User needs and problem framing, user journeys, feature-flow thinking, product documentation, research synthesis, cross-functional collaboration, presentation, prioritisation fundamentals

UX/UI design: Figma, user research, information architecture, user flows, wireframing, prototyping, high-fidelity UI, design systems, developer handoff

Software QA: Manual test design, API testing with Postman, test assertions, status-code and response validation, positive/negative test scenarios, bug reporting, severity and priority assessment, execution and summary reporting

Technical: Python, GitHub, Jira, basic networking and troubleshooting, machine learning fundamentals, explainable AI

QUALITY ASSURANCE PRACTICE

API Testing & Test Documentation | Hands-on Practice

Postman · Jira · GitHub

- Created and worked with a Postman API test collection containing 122 tests, practising systematic validation of API responses and expected behaviour.
- Wrote and applied test assertions for HTTP status codes, required response fields, data types, and response values.
- Practised positive and negative scenarios, including unauthorised access (401), duplicate-resource conflicts (409), and business-rule validation.
- Identified potential defects by comparing actual results with expected results; documented bug descriptions and assessed severity and priority.
- Prepared test documentation, execution reporting, and summary reporting, and organised project artefacts for sharing through GitHub.

PRODUCT, DESIGN & TECHNICAL PROJECTS

TreXpal — Travel Companion App | Solo UI/UX Designer

End-to-end product design · August–November 2025

- Led end-to-end design for a travel companion app concept for Nigerian travellers, focusing on simplifying trip planning and organisation.
- Translated travel-planning needs into user flows, information architecture, wireframes, high-fidelity screens, and interactive Figma prototypes.
- Designed concepts for location discovery, flight and accommodation booking, and collaborative itinerary planning.
- Prepared design-system assets and developer handoff materials to support consistent implementation.

Padijar — Fintech Android App | Solo UI/UX Designer

May–June 2025

- Conducted user research to understand needs and pain points, then translated insights into user flows, wireframes, prototypes, and high-fidelity UI.
- Established a consistent visual design system and designed the experience from initial exploration through prototype.

FinanceEdu — E-learning App | UI/UX Designer

March–May 2025

- Designed an accessible finance-learning experience, including lesson modules, interactive dashboards, and progress-tracking features.
- Used learner needs and pain points to guide user flows, wireframes, prototypes, and interface decisions.

AI-Powered University Identity Management System | Group Project

December 2025–March 2026

- Contributed to a team project exploring a centralised university identity-management platform that uses AI to verify student documents before approval and signing.

5G Network Intrusion Detection & Explainable AI | Final-Year Project

February–September 2026

- Evaluated six tree-based machine-learning models using the 5G-NIDD dataset and compared classification and explainability metrics.
- Applied TreeSHAP to examine model explainability, strengthening analytical evaluation and evidence-based comparison skills.

ADDITIONAL EXPERIENCE

Industry Track Intern | SWIS Africa EmpowHER Programme
Remote · May–September 2026

- Collaborated with a multidisciplinary team on research into women's representation, career progression, and leadership participation within NNPC Limited.
- Contributed to data gathering, analysis, synthesis, and presentation of findings and recommendations.

IT & Networking Intern | Jevi Austin International Company Limited
Port Harcourt · February–August 2025

- Supported deployment and testing of wired and wireless office networks, configured networking equipment, and troubleshot connectivity and hardware/software issues.
- Helped install and maintain computers, printers, and DVR-based CCTV systems, building practical troubleshooting and systems-thinking skills.

LEADERSHIP & COMMUNITY

Vice President | Association of Computer Engineering Students, University of Uyo
2022/2023 Academic Session

- Represented students and collaborated with student leaders, faculty, and peers to coordinate departmental activities and communicate student concerns.

Campus Ambassador | Cowrywise and Cleva
University of Uyo · 2023–Present (Cowrywise); 2025–Present (Cleva)

- Supported campus awareness and engagement initiatives, communicating platform information and relevant opportunities to students.

EDUCATION & CERTIFICATIONS

B.Eng. Computer Engineering — University of Uyo, Uyo, Nigeria | October 2021–September 2026

Google UX Design Professional Certificate (v2) — Coursera, 2025

AI Fundamentals: Foundations for Understanding AI — IBM SkillsBuild, 2026

Data Fundamentals — IBM SkillsBuild, 2026
